Solutions

An emerging IT Solution provider we, Safe Solutions Est. mainly focused on enterprise applications for wide range of businesses and offer a fully integrated solution. Our expertise in information technologies will be fabricated as flawless IT solutions that suit all type of business

We offer our customers with the advanced and practical technical solutions including

- Time & Attendance Solution
- Video Conference Solution
- Access Control Solution
- Wi-Fi Hotspot Solution
- Printing and Imaging Solution

Time & Attendance Solution

Large number of offices, schools, firms, companies and many others are using biometric time attendance system in Saudi Arabia.
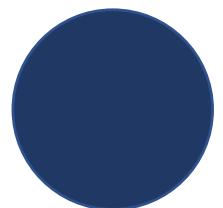

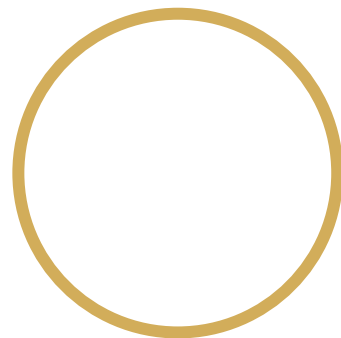

We can use biometric time attendance system technology for employee attendance management because of its ability to recognize people by their unique physiological characteristics. Now days in the markets biometrics time attendance systems are becoming more popular to manage attendance. The biometric time attendance system by finger scanning stops proxy attendance of any employee and it's more reliable than card swapping.

We offer Time & Attendance software solution which supports Finger Print, Face Recognition, RFID and Password authentication.

Video Conference Solution

Video conferencing is an interactive form of communication between 2 or more people. Video conference participants connect in a live video meeting environment where they can see and hear each other, as well as perform other functions such as write messages or share screen content. Video conferences have several advantages for individuals and businesses; however, it requires the right equipment and digital infrastructure to support it

Online meeting is the way to go when distance matter. And our system helps you be a part of the meetings with quality video and clear voice.

Video conferencing internally helps employees achieve a better work/life balance, as they have the possibility to work remotely while still being able to communicate effectively with others.

Overall, the benefits of video conferencing solutions as summarized as:

- Save costs
- Build relationships
- Increase productivity
- Reduce travel time
- Improve Work/Life Balance
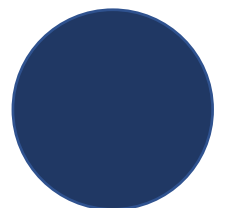

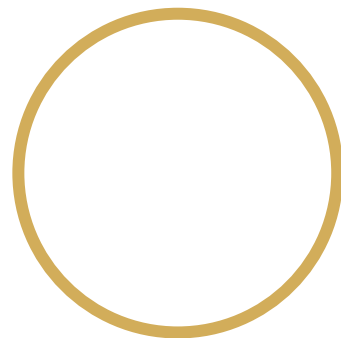

Access Control Solution

Access control is a security technique that regulates who or what , can view or use resources in a computing environment. It is a fundamental concept in security that minimizes risk to the business or organization

There are two types of access control: physical and logical. Physical access control limits access to campuses, buildings, rooms and physical IT assets. Logical access control limits connections to computer networks, system files and data

There are many types of access control software and technology, and often, multiple components are used together to maintain access control. The software tools may be on premises, in the cloud or a hybrid of both. They may focus primarily on a company's internal access management or may focus outwardly on access management for customers.

We offer various types of access control technology and software.

Wi-Fi hotspot solution

Wi-Fi hotspots are internet access points that allow you to connect to a Wi-Fi network using your computer, smartphone or another devices while away from your home or office network.

These hotspots solution help customers or Visitors to access faster internet connections than what is often available on networks.

Safe Solutions Est. is the place where solutions are provided to turn business premises of our valued clients into Wi-Fi Hot Spots. Our main features are..

- Remote AP management over the Internet
- Quality of Service (QoS) Management
- Steady Connectivity
- Responsive Support
- Guaranteed Reliability
- Standard Wireless Clients
- Network Security
- Ease of Use

Printing & Imaging Solution

Do you experience a lot of compatibility, device, security, cost, and paper wastage issue with workplace printing tasks? Get rid of the headache and try these print management solution to save money and make employees or users happy.

Print management is the utilization of different practices like printing machine tracking, computing device tracking, print output monitoring, sensitive data security, printing cost optimization, and print analytics. The latest intelligent software developers combine all these functionalities in one place to develop a print management solution.

Benefits of Print Management

- Reducing Printing Costs
- Securing Confidential Documents
- Streamlining the Printing Operation
- Enabling Remote Printing
- Reducing Paper Wastage
